# PART 1: THE FOUNDATION

*Offer Details | The Promise | The Problem | The Solution | Sales Argument | USP*

## A. OFFER DETAILS

---

**Primary Offer:** Outpatient physical therapy services — individualized, hands-on care at 6 convenient locations across Louisiana and Mississippi

**Key Features & Benefits:** Comprehensive whole-body evaluations (not just treating the injury site), expert licensed therapists, hands-on manual therapy, corrective exercises, trigger point dry needling, performance enhancement, and warm family-style care environment

**Packaging & Presentation:** Doctor-referral model — patients arrive through trusted physician relationships. Care PT has cultivated deep, long-standing partnerships with physicians, orthopedic surgeons, and specialists throughout the region. The clinic environment is described as a 'luxury spa clinic' — professional, clean, welcoming

**Pricing Structure:** Insurance copay model — accepts most major private insurance plans. Some cash-pay options available. Goal is to minimize financial friction at point of decision

**Additional Value:** Comprehensive care approach — evaluating the whole body, not just the specific complaint. Patients receive a full picture of their health, not a narrow fix

**Guarantees & Risk Reversals:** Compliance-focused culture — Care PT partners with patients in their recovery journey. The team's commitment to consistent, quality care serves as the implicit guarantee

**Campaign Goal:** Lead generation — drive new patient appointment requests via the website

**CTA:** Request an Appointment

**Website:** <https://www.carephysicaltherapy.net/>

**Ad Platforms:** Facebook and Instagram (META)

---

## B. THE PROMISE

---

***"We will give you back the life pain took from you — through expert, individualized, hands-on care that treats you as a whole person, not a diagnosis."***

Care Physical Therapy promises every patient an experience that is the antithesis of the impersonal, high-volume PT clinic model. The promise is threefold: clinical excellence through comprehensive evaluation and skilled manual therapy; genuine human connection through a family-style care culture; and lasting results through whole-body treatment that addresses root causes, not just symptoms.

For the patient who has been told PT didn't work before, who fears being another face in a revolving-door clinic, or who simply needs to know someone truly sees them — Care PT's promise is the answer to every one of those fears.

---

## C. THE PROBLEM

---

### Primary Problem the Market Faces

The people Care Physical Therapy serves are experiencing one or more of these realities: physical pain that limits their capability, independence, and quality of life; post-surgical recovery anxiety; chronic

pain that has resisted previous treatment; sports or occupational injuries that are disrupting their identity and livelihood; or age-related physical decline that threatens their independence.

The deeper problem is not just the pain itself — it is what pain takes away. It takes away morning routines, sport and hobbies, the ability to parent actively, the confidence to keep up with grandchildren, the performance edge at work. Pain robs people of the life they are supposed to be living.

### **Secondary Problem: The Industry Failure**

Most patients have had a previous PT experience that was mediocre or worse — high-volume clinics where they sat on a machine for 40 minutes, rarely saw a licensed therapist, and were handed a generic exercise sheet. This has created widespread skepticism about whether PT can actually help. Care PT must overcome not just the physical problem but the experiential trauma of bad healthcare.

---

## **D. THE SOLUTION**

---

Care Physical Therapy solves both problems simultaneously. The clinical solution is a comprehensive whole-body evaluation and individualized treatment plan that gets to the actual root of the problem — not just the symptom. The human solution is a care culture so warm and personal that patients stop feeling like patients and start feeling like family.

### **How Care PT Delivers the Solution**

- Comprehensive whole-body evaluation at first visit — identifying root causes others miss
  - Hands-on manual therapy by licensed, experienced physical therapists
  - Individualized treatment plans built around each patient's specific life, goals, and timeline
  - Consistent care team — same therapist builds a relationship with each patient over their full treatment course
  - 6 convenient locations across Louisiana and Mississippi removing the logistics barrier
  - Deep physician partnership network ensuring patients arrive with pre-established trust
  - Family-style clinic culture transforming appointments from dreaded obligations into genuinely positive experiences
  - Proven track record — thousands of successfully treated patients and strong Google review presence
- 

## **E. SALES ARGUMENT**

---

The most powerful sales argument for Care Physical Therapy is not clinical — it is human. In a healthcare landscape dominated by high-volume, impersonal care, Care PT offers something genuinely rare: a team that knows your name, understands your life, and measures success by whether you can do the things that matter to you again.

The clinical credentials are impressive and should be stated clearly. But what converts a hesitant prospect into a committed patient is the evidence that this clinic is different — in the warmth of the first phone call, the thoroughness of the evaluation, the consistency of the care team, and the testimonials from people just like them who got their lives back.

The sales argument is: You've probably been to PT that didn't feel like this. Give us the chance to show you what care that actually sees you looks like. Thousands of patients across Louisiana and Mississippi have. Most of them wish they'd come sooner.

---

## F. UNIQUE SELLING PROPOSITION (USP)

---

*"Individualized, hands-on care that treats your whole body — not just your injury — delivered by a team where you're not a patient number, you're family. 6 locations. Thousands treated. One goal: getting you better."*

### USP Pillars

- **COMPREHENSIVE WHOLE-BODY CARE** — Not cookie-cutter. Not generic. Every plan starts with a full evaluation that looks at the entire person, not just the injury site
- **HANDS-ON EXPERTISE** — Licensed therapists using manual therapy, trigger point techniques, corrective exercise, and performance enhancement — not just machines
- **THE FAMILY CULTURE** — 'When you're here, you're family.' A warm, personal care environment that stands in direct contrast to impersonal volume-care clinics
- **PHYSICIAN TRUST** — Every referral arrives pre-validated by the most trusted authority in the patient's life — their doctor
- **REGIONAL CONVENIENCE** — 6 locations across Louisiana and Mississippi making consistent attendance achievable for real people with real schedules
- **PROVEN OUTCOMES** — Thousands of successfully treated patients and a strong Google review record that speaks louder than any advertisement
- **MISSION-DRIVEN** — To inspire and empower through healing. This is not a transaction — it is a partnership in the patient's recovery journey

---

## G. FUNNEL STRUCTURE

---

**Primary Entry Point:** Doctor referral (dominant channel) + META paid social ads (growth channel)

**Initial Engagement:** Facebook/Instagram ad → website landing page → appointment request form

**Conversion Step:** Appointment request submitted at carephysicaltherapy.net

**Lead Nurturing:** Warm front desk follow-up call + confirmation communication

**Post-Appointment Retention:** Exceptional in-clinic experience, consistent care team, and genuine relationship building

**Upsell / Cross-Sell:** Additional services only when clinically indicated and beneficial to the patient

**Long-Term Engagement:** Word-of-mouth referrals generated by outstanding patient experience — the most powerful growth engine in the business

# PART 2: THE AUDIENCE

Primary Marketing Avatar | 5 Comprehensive Customer Personas

## PRIMARY MARKETING AVATAR OVERVIEW

---

**Age Range:** 18–54, with sweet spot at 30–52

**Gender:** Male and female; women 35–54 skew slightly higher for proactive healthcare decisions

**Location:** Louisiana and Mississippi communities within driving distance of Care PT's 6 locations

**Insurance:** Privately insured — employer-sponsored or individual coverage

**Core Values:** Health-consciousness, self-awareness, personal responsibility, body autonomy, community trust

**Motivation:** Recovering from injury/surgery, managing chronic pain, or addressing physical limitation that is disrupting their life

**Decision Trigger:** Doctor's referral (primary), peer recommendation, Google reviews

**Target KPI:** New patient appointment requests via website

---

## AVATAR 1: THE POST-SURGICAL COMEBACK — "Recovering Rita"

---

**Age:** 45–62 | Female-skewing | Middle to upper-middle income | Privately insured

**Occupation:** Mid-career professional, nurse, teacher, caregiver, or semi-retired active adult

**Core Problem:** Recently underwent orthopedic surgery (knee/hip replacement, rotator cuff repair, spinal procedure) and needs PT to complete recovery. Motivated but apprehensive about the rehabilitation process.

### Emotional Profile

- Top Emotional Needs: Safety, being seen, progress visibility, reassurance, hope
- Top Pain Points: Post-surgical pain, fear of re-injury, uncertainty about recovery timeline, guilt about dependence, scheduling challenges
- Greatest Fears: Permanent loss of mobility, failed surgery, being a burden, financial exposure, being treated as just another case
- Motivating Emotions: Hope for full recovery, love for family, pride in self-sufficiency, trust once established

### Decision-Making

- Risk Tolerance: Very low — needs maximum reassurance at every step
- Purchase Cycle: Immediate upon surgeon referral — she is pre-sold before arrival
- Key Questions: Insurance coverage, realistic recovery timeline, what sessions feel like, therapist credentials
- Trust Signals: Surgeon referral, Google reviews from post-surgical patients, warm first impression

### Transformation

Rita wakes up without dreading movement. She gardens, drives herself to church, keeps up with grandchildren, and returns to full activity — stronger and more capable than she expected. She becomes a fierce advocate and sends every friend with an injury directly to Care PT.

---

## AVATAR 2: THE ACTIVE PROFESSIONAL — "Go-Getter Greg"

---

**Age:** 28–45 | Male-skewing | Upper-middle income | Excellent private insurance

**Occupation:** Business professional, manager, engineer, sales rep, or contractor — ambitious, high-performing

**Core Problem:** A sports or gym injury (shoulder strain, knee injury, lower back) has sidelined him from the athletic activity that defines his identity. He is impatient, data-driven, and will engage fully or not at all — depending on whether his therapist earns his respect.

### Emotional Profile

- Top Emotional Needs: Control, speed, respect, precision, achievement
- Top Pain Points: Being sidelined from sport/gym, losing conditioning, slow or generic recovery plans, impersonal care, no measurable progress
- Greatest Fears: Chronic injury, lost athletic capability, receiving a plan built for sedentary patients
- Motivating Emotions: Competitive drive, urgency, performance identity, data obsession

### Decision-Making

- Risk Tolerance: Low for re-injury; high for evidence-based new modalities
- Purchase Cycle: Rapid once clinic demonstrates sports medicine credibility
- Key Questions: Return-to-sport timeline, customized plan, fitness maintenance during recovery, measurable progress metrics
- Trust Signals: Doctor referral + athletic peer recommendation + sports medicine credentials visible on website

### Transformation

Greg returns to sport at 100% — stronger than pre-injury. He tells everyone in his gym, golf group, and office about Care PT. He becomes one of the clinic's most vocal and high-volume referral sources.

---

## AVATAR 3: THE AGING ACTIVE SENIOR — "Independent Irene"

---

**Age:** 58–75 | Female-skewing | Middle income | Medicare-supplemented or retiree coverage

**Occupation:** Retired or semi-retired; identity tied to family, faith community, gardening, volunteering

**Core Problem:** A fall, arthritis flare-up, or slow physical decline has crossed the threshold from manageable to limiting. Her deepest fear is not the physical problem — it is what it represents: the beginning of losing her independence.

### Emotional Profile

- Top Emotional Needs: Dignity, belonging, safety, hope, independence preservation
- Top Pain Points: Chronic pain limiting mobility, fear of falling, feeling like a burden, watching capability decline, confusion about safe exercise
- Greatest Fears: Losing independence, ending up in a care facility, being unable to drive or live alone
- Motivating Emotions: Love for grandchildren, pride in independence, community identity, fear of the alternative

## Decision-Making

- Risk Tolerance: Very low — needs maximum safety assurance and step-by-step explanation
- Purchase Cycle: Doctor referral + adult children encouragement + pain threshold crossed
- Key Questions: Is PT safe for my age? Will I have the same therapist? What should I wear? How do I get there?
- Trust Signals: Physician referral, clinic warmth, staff who remember her name, testimonials from peers her age

## Transformation

Irene kneels in her garden, drives herself to church, chases her grandchildren at Easter, and tells every friend and neighbor about Care PT. She is a word-of-mouth powerhouse — one deeply satisfied patient in this avatar can fill a clinic's referral pipeline through her community network alone.

---

## AVATAR 4: THE BUSY WORKING PARENT — "Stressed-Out Steven"

---

**Age:** 32–48 | Male or female | Middle to upper-middle income | Privately insured

**Occupation:** Mid-career professional, tradesperson, healthcare worker, or small business owner at peak career + family demand intersection

**Core Problem:** A work or sports injury he has been ignoring for months because he genuinely has no time. His doctor finally insisted. His #1 barrier is not motivation — it's logistics. Between work, kids, and household, fitting PT into his schedule feels impossible.

## Emotional Profile

- Top Emotional Needs: Efficiency, reliability, guilt relief, control, validation
- Top Pain Points: Physical pain limiting work performance, inability to parent actively, guilt about ignoring it, scheduling complexity, fear of chronic progression
- Greatest Fears: Permanent injury, missing his children's activities, being seen as less capable at work
- Motivating Emotions: Responsibility, urgency, pride in being the capable provider, fear of the injury worsening

## Decision-Making

- Risk Tolerance: Low after injury — motivated by 'this costs more if I wait' thinking
- Purchase Cycle: Fast once doctor says 'now' — he has already been waiting too long
- Key Questions: Early morning or evening appointments? How many sessions? What does insurance cover? Can I start this week?
- Trust Signals: Doctor referral + quick scheduling + efficient first impression + 6 convenient locations

## Transformation

Steven coaches his son's baseball game pain-free. He gets through full workdays without breaks for back pain. He sleeps through the night. He stops being 'the dad who watches from the bench' and becomes fully present again. He becomes a fast and specific referral source within his professional and sports social circles.

---

## AVATAR 5: THE CHRONIC PAIN WARRIOR — "Weary Wendy"

---

**Age:** 35–58 | Female-skewing | Middle income | Privately insured, cost-aware

**Occupation:** Working adult whose career has been impacted by chronic pain — reduced hours, accommodations, or changed roles

**Core Problem:** Years of chronic pain — fibromyalgia, chronic back pain, recurring injury — that has resisted multiple treatments. She has tried PT before at other clinics and was let down. She is skeptical, exhausted, and self-protective — but hasn't given up. She needs to be genuinely heard before she will trust.

### Emotional Profile

- Top Emotional Needs: Being believed, personalization, grounded hope, empowerment, consistency
- Top Pain Points: Daily chronic pain degrading quality of life, feeling dismissed by providers, financial drain from failed treatments, social isolation, lost professional capacity
- Greatest Fears: This is simply her life now; wasting more money and energy; false hope; another generic plan
- Motivating Emotions: The possibility of less pain, wanting to show up for family, anger at stolen years, the testimonial of someone exactly like her

### Decision-Making

- Risk Tolerance: Low-to-moderate — burned before; will try again only if approach feels genuinely different
- Purchase Cycle: Doctor referral + exhaustion of alternatives + willingness to try one more time
- Key Questions: Have you helped chronic pain patients, not just post-surgical? Will you look at my full history? What makes this different? What are realistic expectations?
- Trust Signals: Therapist who listens fully before speaking, personalized plan acknowledging her history, chronic pain patient testimonials

### Transformation

Wendy wakes up and the first thought of the day is not pain — for the first time in years. She returns to work full-time. She accepts social invitations. She has a self-management toolkit. She tells her story in every chronic pain community she belongs to, and she gives genuine hope to others still suffering. She is Care PT's most passionate long-term advocate.

## B. 5 LONG-FORM AD POSTS (1,800–2,200 characters)

---

CTA: Request an Appointment | URL: <https://www.carephysicaltherapy.net/> | Tone: Professional, Reassuring, Solution-Oriented

### LONG-FORM POST 1 — Framework: PAS (Problem-Agitation-Solution)

Target Avatar: Recovering Rita | Character Count: 1,847

***"Your doctor referred you. Here's why that matters."***

You didn't choose to need physical therapy. Pain, injury, or surgery made that choice for you. And now you're standing at a crossroads — you can go through the motions at a clinic that treats you like a number on a chart... or you can choose a team that treats you like a person with a name, a story, and a life worth getting back to. At Care Physical Therapy, we see that difference every single day. We know what it's like to sit in pain wondering if things will ever feel normal again. We know the frustration of sleepless nights, the exhaustion of limiting what you do, and the quiet fear that maybe this is just your life now. It doesn't have to be. Our experienced team of licensed physical therapists specializes in individualized, hands-on care — not generic exercise sheets and a timer counting down your appointment. Every treatment plan begins with a comprehensive whole-body evaluation, because the area that hurts isn't always where the problem starts. We've successfully treated thousands of patients across Louisiana and Mississippi for back pain, knee injuries, neck pain, shoulder problems, balance disorders, and more. When your doctor refers you to Care PT, they're not just pointing you somewhere — they're placing their trust in a team they believe will take care of you. And when you're here, you're family. 🙌 Request your appointment today: <https://www.carephysicaltherapy.net/> You've waited long enough. Let's get you back to the life you love.

## LONG-FORM POST 2 — Framework: Storytelling / Transformation

Target Avatar: Stressed-Out Steven | Character Count: 1,923

***"He almost missed his son's baseball season. Then he found Care PT."***

Three months ago, David could barely get through a full workday without stopping to stretch his back in the bathroom. He'd been putting off seeing anyone about it. Between managing his team at work, coaching his son's little league games on weekends, and keeping up with everything else life demanded — there just wasn't time. Until one Tuesday when he could barely get out of the car. His doctor finally said what he already knew: 'You need physical therapy. And you need it now.' The problem? David had been to PT before. He remembered waiting 20 minutes, being handed a printout of exercises, and never actually seeing a qualified therapist for more than 5 minutes. Then a colleague told him about Care Physical Therapy. His first appointment was different from the moment he walked in. The front desk staff knew his name before he even sat down. His therapist sat with him for a full evaluation — not just the injury, but his whole lifestyle, his job, his goals, and what 'getting better' actually meant to him. Six weeks later, David was back on the field coaching third base. Pain-free. 'I kept thinking I didn't have time for PT,' he told us. 'Turns out I didn't have time NOT to go.' At Care PT, our 6 locations across Louisiana and Mississippi are designed to make consistent care fit into your real life — not the other way around. 🙌 Request yours now: <https://www.carephysicaltherapy.net/>

## LONG-FORM POST 3 — Framework: Overcoming Objections

Target Avatar: Weary Wendy | Character Count: 2,051

***"If you've tried PT before and it didn't work — read this."***

We hear it more than you'd think: 'I've already done physical therapy. It didn't help.' And we want to say something important to anyone who feels that way: we believe you. Your experience was real. Your frustration is valid. The truth is, not all physical therapy is created equal. Many clinics operate on a high-volume model — 3, 4, sometimes 5 patients per therapist at the same time. You get 10 minutes of hands-on attention and 40 minutes on a machine. At Care Physical Therapy, we do things differently. Every patient begins with a comprehensive whole-body evaluation — not just the site of your pain, but the interconnected systems that may be contributing to it. Your shoulder pain might have roots in your posture. Your chronic back pain might be connected to how you're compensating in your hips. We find what others miss. Our licensed therapists use hands-on manual therapy, corrective exercise, trigger point therapy, and performance enhancement techniques — all tailored specifically to you. Not to your diagnosis. To you. We've helped patients who had already tried two or three other clinics finally find the relief they were looking for. Not because we have magic, but because we take the time that others won't. You haven't failed at physical therapy. You just haven't found the right team yet. 🙌 Request your appointment: <https://www.carephysicaltherapy.net/> You deserve to feel better. Let us show you how.

## LONG-FORM POST 4 — Framework: AIDA

Target Avatar: Go-Getter Greg | Character Count: 1,984

***"Pain is sidelining you. Your competition isn't waiting."***

Stop for a second and think about what this injury is actually costing you. It's not just the pain — though that's real enough. It's the gym sessions you've skipped. The golf rounds you've backed out of. The weekend league games you watched from the sideline instead of playing. You're running at 70% when you're built to run at 100. At Care Physical Therapy, we specialize in getting people like you back to full capacity — not just 'functional,' but performing at the level you expect from yourself. Our comprehensive whole-body evaluation doesn't just look at where it hurts. It looks at movement patterns, biomechanical weaknesses, and compensations your body has developed around the injury — compensations that, left unaddressed, are setting you up for the next injury before you've recovered from this one. Our therapists are trained in hands-on manual therapy, trigger point techniques, corrective exercise, and performance-focused rehabilitation. We don't hand you a generic sheet and send you to a stationary bike. We build a plan around your body, your goals, and your timeline. This doesn't have to be a long road. With the right team and the right plan, recovery can move faster than you think. 🙌 Request your appointment today: <https://www.carephysicaltherapy.net/> Your body is ready to heal. Are you ready to let it?

## LONG-FORM POST 5 — Framework: Social Proof + Empathy-Driven

Target Avatar: Independent Irene | Character Count: 2,089

***"At 67, she thought her gardening days were over. They weren't."***

Margaret had been dealing with the knee pain for two years. She'd tried rest. She'd tried over-the-counter medications. She'd even tried just accepting it. But when she couldn't kneel in her garden anymore — the thing she'd done every spring for 40 years — she finally decided enough was enough. Her doctor referred her to Care Physical Therapy. She almost didn't go. She worried it would be too intense, too clinical, or that she'd be surrounded by younger patients who made her feel out of place. What she found was the opposite. From the moment she walked through the door, she felt welcome. Her therapist took over an hour on her initial evaluation — asking not just about her knee, but about her life, her goals, and what independence meant to her. 'I told them I just wanted to get back in my garden,' Margaret told us. 'And they took that seriously. That was my goal. And we worked toward it every single visit.' Eight weeks later, Margaret was on her knees in the dirt, planting tomatoes. At Care Physical Therapy, we believe that age is not a limitation — it's a context. Your care plan is built around your life, your body, and your definition of what 'better' looks like. You don't have to accept pain as your normal. 🙌 Request your appointment: <https://www.carephysicaltherapy.net/>

---

## C. 5 SHORT-FORM AD POSTS (350–850 characters)

### SHORT-FORM POST 1 — Call-to-Action First | 492 characters

Stop waiting for it to get better on its own. Some injuries heal with rest. Others get worse every week you ignore them. If you've been telling yourself 'I'll deal with it soon' for longer than a month — your body is trying to tell you something. At Care Physical Therapy, our experienced team provides hands-on, individualized care that gets to the root of the problem — not just the symptom. 6 locations across Louisiana and Mississippi. Real therapists. Real results. 🙌 Request your appointment today: <https://www.carephysicaltherapy.net/>

### SHORT-FORM POST 2 — Empathy-Driven | 511 characters

You shouldn't have to live in pain. And you don't have to. Pain changes everything. The way you sleep. The way you move. The way you show up for the people who count on you. At Care Physical Therapy,

we've helped thousands of patients in Louisiana and Mississippi find real, lasting relief — through expert hands-on care and treatment plans built specifically for them. Not a number. Not a diagnosis code. A person. Your person. When you're here, you're family. 🙌 Book your appointment: <https://www.carephysicaltherapy.net/>

### SHORT-FORM POST 3 — Data-Driven / Social Proof | 548 characters

Thousands treated. Hundreds of 5-star reviews. One goal. Getting you better. Care Physical Therapy has successfully treated thousands of patients across 6 Louisiana and Mississippi locations for back pain, knee injuries, neck pain, shoulder problems, balance disorders, and more. Our licensed therapists use comprehensive whole-body evaluations and hands-on treatment — because you deserve more than a generic exercise sheet. See why our patients keep coming back — and keep sending their friends. 🙌 Request your appointment: <https://www.carephysicaltherapy.net/>

### SHORT-FORM POST 4 — Transformation and Vision | 487 characters

What would you do tomorrow if you weren't in pain? Play with your kids. Walk without stopping. Sleep through the night. Get back to the things that make life feel full. That's what we're working toward every single day at Care Physical Therapy. Individualized, hands-on care — close to your home. 6 convenient locations across Louisiana and Mississippi, a team that truly listens, and a treatment plan built around your life and your goals. Your comeback starts with one appointment. 🙌 <https://www.carephysicaltherapy.net/>

### SHORT-FORM POST 5 — Objection Handling | 574 characters

No referral? No problem. We accept most insurance. One of the biggest reasons people put off physical therapy? They think it's complicated to get started. It's not. At Care Physical Therapy, we've made it simple. With 6 locations across Louisiana and Mississippi, flexible scheduling, and acceptance of most major insurance plans — getting the care you need has never been easier. Your doctor may have already referred you. Or you can request an appointment directly. Either way, your recovery is one click away. 🙌 Request your appointment: <https://www.carephysicaltherapy.net/>

## D. 10 IMAGE IDEAS & AI PROMPTS

---

### Image Ideas

26. LIFESTYLE ALIGNMENT — Woman late 50s kneeling in garden, pain-free, golden morning light. Sells the outcome not the service. Target: Recovering Rita, Independent Irene
27. CLINIC WARMTH — Therapist performing hands-on care, both smiling naturally. Addresses 'will anyone care about me?' objection. Target: All avatars
28. TEXT OVERLAY — Active man 40s walking confidently outdoors. Bold overlay: 'Back to 100%. No surgery required.' Target: Go-Getter Greg, Stressed-Out Steven
29. PATIENT TESTIMONIAL QUOTE CARD — 5-star review on branded Care PT background. Highly trust-building for skeptical prospects. Target: Weary Wendy, Recovering Rita
30. BEFORE-DURING-AFTER 3-PANEL — Visual story: couch in pain → clinic with therapist → playing with kids. Target: Stressed-Out Steven, Recovering Rita
31. EYE CONTACT CLOSE-UP — Therapist looking directly at camera, warm expression, patient's hand visible. Text: 'When you're here, you're family.' Target: All avatars
32. STAT-DRIVEN INFOGRAPHIC — '6 Locations. Thousands Treated. One Goal.' Map of Louisiana/Mississippi with location pins. Target: Go-Getter Greg, analytical searchers
33. RELATABLE PROBLEM SPLIT IMAGE — Person in pain at work left side / same person thriving at Care PT right side. 'Stop pushing through it. Start fixing it.' Target: Stressed-Out Steven

- 34. TEAM WARMTH — Candid group of Care PT staff smiling in clinic. Text: 'Your team is ready.' Humanizes the brand. Target: Irene, Rita
- 35. ASPIRATION — Father running with child at park, pure joy. Text: 'This is what recovery looks like.' No clinical imagery. Target: Stressed-Out Steven, parent avatars

## 10 AI Image Prompts (for Midjourney, DALL-E, Adobe Firefly)

- 36. Photorealistic lifestyle photo of a woman in her late 50s kneeling in a lush garden on a bright morning, smiling naturally, hands in soil, warm golden hour light, pain-free, casual clothing, shallow depth of field, no medical equipment, professional camera, candid feel
- 37. Photorealistic image of a licensed physical therapist performing hands-on manual therapy on patient's shoulder in clean modern outpatient PT clinic, both smiling, warm professional lighting, genuine connection, editorial style
- 38. Photorealistic image of a confident man in his early 40s walking outdoors on a sunny day, strong purposeful posture, natural smile, athletic casual clothing, suburban park background, completely healthy, slight bokeh
- 39. Clean professional social media graphic, warm blue and white palette, large bold readable font displaying patient testimonial quote center, five gold stars top, subtle clinic background image, modern sans-serif typography, healthcare brand aesthetic
- 40. Three-panel horizontal graphic flat design. Panel 1: person on couch holding back, muted gray tones. Panel 2: same person in PT clinic with therapist, warmer tones. Panel 3: same person outdoors with children, vibrant full color. Minimalist design, blue and white brand colors
- 41. Close-up portrait of warm professional female physical therapist in clinical attire looking directly into camera, calm confident caring expression, soft natural lighting, patient hand partially visible at edge, shallow depth of field, clean white clinic background, emotionally engaging
- 42. Clean modern infographic graphic design, blue and white palette, simple outlined map of Louisiana and Mississippi with six location marker dots, bold large typography with key statistics, icon-style illustrations, professional healthcare marketing aesthetic
- 43. Split-image photorealistic composite. Left: man 40s at standing desk, hand on lower back, muted cool tones. Right: same man in bright PT clinic, upright posture, smiling with therapist. Clean dividing line, warm tones on right, professional advertising quality
- 44. Candid-style group photo of four PT clinic staff in branded clinical attire, smiling together in modern bright outpatient therapy clinic, natural warm lighting, genuinely happy and approachable, clean clinical background with equipment visible, high resolution editorial feel
- 45. Photorealistic lifestyle photo of man in late 30s running and laughing with young child age 5-7 at sunny park, both mid-action, pure joy on faces, father completely healthy and strong, warm afternoon light, green grass background, shallow depth of field, no medical imagery, emotional authentic family moment

# PART 4: VIDEO HOOKS & SCRIPTS

10 Viral Opening Hooks | 3 Full Video Scripts with Scene & B-Roll Suggestions

## A. 10 VIRAL VIDEO OPENING HOOKS

---

46. "Stop scrolling if you've been pushing through pain for longer than you should."
  47. "Everything you've been told about waiting for pain to go away on its own — it's costing you more than you think."
  48. "If your doctor just referred you to physical therapy and you're not sure what to expect — this is for you."
  49. "There's a reason thousands of people in Louisiana and Mississippi have trusted Care Physical Therapy — and it has nothing to do with fancy equipment."
  50. "She told me she almost didn't come in. She'd been to PT before and it didn't help. Two months later, she was back in her garden — pain free."
  51. "Most people don't realize that the place their pain is doesn't always reveal where the problem actually starts."
  52. "I know you're probably thinking — I don't have time for physical therapy. I want to show you why that thinking is keeping you stuck."
  53. "Our team of licensed physical therapists has treated thousands of patients across six locations — and the #1 thing they all had in common? They waited too long."
  54. "Imagine waking up tomorrow and the first thought of your day isn't about pain. That's what we're working toward at Care Physical Therapy."
  55. "Did you know that most people with untreated physical injuries develop compensating movement patterns that create a second injury within 18 months? Here's what to do instead."

## B. 3 FULL VIDEO SCRIPTS

---

All scripts: 60–120 seconds | Professional, Reassuring, Solution-Oriented tone | CTA included | No website URL spoken aloud

### VIDEO SCRIPT 1 — Transformation / Vision | Hook #9

**Framework:** Problem-Solution-Action | Target Avatar: Recovering Rita / Independent Irene

**Scene:** *Therapist or clinic owner on camera, warm lighting, direct eye contact, natural clinical background*

[OPENING]Imagine waking up tomorrow — and the first thought of your day isn't about pain.No calculating how you're going to get through the morning routine. No dreading the stairs. No wondering if today is going to be a good day or a bad one.That's what recovery actually looks like. And it's closer than you think.[BODY]At Care Physical Therapy, we don't just treat the injury. We look at your whole body — because pain is rarely as simple as it seems on the surface.Our licensed therapists create a personalized care plan for every single patient — built around your life, your goals, and what getting better actually means to you.We've helped thousands of patients across Louisiana and Mississippi get back to the things they love — their families, their hobbies, their independence.And when you're here — you're family.[CLOSE]With six convenient locations, getting started has never been easier.Request your appointment today and take the first step toward the life you deserve.

**Word Count:** 167 words | Estimated Time: ~67 seconds

**B-Roll Suggestions:** Patient gardening / walking / playing with grandchildren; therapist conducting evaluation; clinic interior showing warmth; Care PT logo and website

## VIDEO SCRIPT 2 — Objection Handling | Hook #7

**Framework:** Objection Handling → Empathy → Resolution | Target Avatar: Stressed-Out Steven / Go-Getter Greg

**Scene:** *Direct address to camera, confident and empathetic, slightly faster-paced energy*

[OPENING]I know what you're thinking. You don't have time for physical therapy. You've got work, you've got family, you've got a schedule that doesn't have room for one more thing. I hear that. And I want you to understand something important. [BODY]Every week you put off treating that injury — your back, your knee, your shoulder — your body is compensating. Building habits around the pain. Making it harder and more expensive to fix later. The good news? Care Physical Therapy has six locations across Louisiana and Mississippi — designed to fit into your real life, not the other way around. Our team of experienced, licensed therapists will get to the root of your problem with a comprehensive whole-body evaluation — and build a plan that actually works for your schedule and your goals. You don't have to choose between your health and everything else demanding your time. [CLOSE]You just have to make one appointment. Request yours today — and let's get you back to 100%.

**Word Count:** 183 words | Estimated Time: ~73 seconds

**B-Roll Suggestions:** Busy professional at desk with back pain; man coaching kids' sports; 6 location pins on map; therapist and patient in high-energy session; person returning to sport/activity

## VIDEO SCRIPT 3 — Storytelling / Social Proof | Hook #5

**Framework:** Storytelling → Social Proof → CTA | Target Avatar: Weary Wendy / All skeptical avatars

**Scene:** *Warm storytelling tone, slight pause after opening line for impact, personal and inviting delivery*

[OPENING]She almost didn't come in. She'd been to physical therapy before — at a different clinic — and it hadn't helped. She figured it was just her life now. Managing the pain. Getting through the day. But her doctor referred her to us. And she decided to give it one more try. [BODY]At Care Physical Therapy, we started with something different — a comprehensive whole-body evaluation. Not just looking at where it hurt, but why. Six weeks later, she called the office to tell us she'd slept through the night for the first time in two years. That's what individualized, hands-on care looks like. If you've tried PT before and didn't get the results you needed — we understand. And we want the chance to show you what care that truly listens looks like. Thousands of patients across Louisiana and Mississippi have trusted Care PT with their recovery. [CLOSE]You deserve to be one of them. Request your appointment today. Your comeback story starts here.

**Word Count:** 191 words | Estimated Time: ~76 seconds

**B-Roll Suggestions:** Patient testimonial clips or Google review graphics; therapist listening attentively to patient; before/after lifestyle shots; warm clinic environment showing staff connection with patients

# PART 5: TARGETING & CAMPAIGN STRATEGY

20 Interest Cohorts | 3 Campaign Ideas | Brand Style Guide | \$20 Micro Budget Strategy

## A. 20 META INTEREST COHORT TARGETING SUGGESTIONS

Platform: Facebook & Instagram (META) | Goal: New patient appointment requests | Each cohort can be expanded into 20+ specific sub-targets within META Ads Manager

56. DOCTOR & HEALTHCARE RELATIONSHIP FOLLOWERS — People who follow orthopedic surgeons, primary care physicians, spine specialists, sports medicine doctors. Pre-warmed for PT referral messaging. Expandable into specific physician specialty pages.
57. POST-SURGICAL RECOVERY COMMUNITY — People engaging with joint replacement recovery, rotator cuff repair, ACL recovery, post-surgical rehab content, and recovery timeline research. Highest-intent cold audience.
58. CHRONIC PAIN COMMUNITY — Fibromyalgia awareness groups, chronic back pain communities, herniated disc support groups, persistent pain management content followers. Weary Wendy's digital home.
59. ACTIVE ADULTS & RECREATIONAL ATHLETES (35–55) — Golf, pickleball, tennis, cycling, hiking, recreational league communities. Focus on injury-adjacent content engagers within this group.
60. HEALTH-CONSCIOUS GRANDPARENTS & ACTIVE SENIORS — Active aging content, senior fitness pages, fall prevention resources, gardening communities, grandparenting lifestyle followers. Independent Irene's community.
61. WORKING PARENTS IN PHYSICAL OCCUPATIONS — Teachers, nurses, construction workers, tradespeople engaging with occupational health and work-life balance content. Stressed-Out Steven's professional world.
62. PHYSICAL THERAPY & WELLNESS AWARENESS ENGAGERS — People who previously engaged with PT content, rehabilitation centers, or sports medicine pages but have not yet converted locally. Warm audience.
63. LOOKALIKE AUDIENCE — WEBSITE VISITORS — 1–3% Lookalike from carephysicaltherapy.net pixel data. Highest quality cold audience META can generate. Segment by location near each clinic.
64. INSURANCE & HEALTHCARE NAVIGATION RESEARCHERS — People actively researching health insurance, copay structures, understanding benefits, Medicare supplements. Pre-qualified healthcare decision-making mindset.
65. LOCAL COMMUNITY & NEIGHBORHOOD GROUPS — Members of Facebook neighborhood groups near each of the 6 locations. Hyper-local targeting leveraging Care PT's strongest competitive advantage: community reputation.
66. FITNESS & GYM ENTHUSIASTS EXPERIENCING SETBACKS — CrossFit, weightlifting, 'fit over 40' communities combined with injury recovery / 'returning to gym after injury' signals. Go-Getter Greg's community.
67. CAREGIVERS & FAMILY HEALTH DECISION-MAKERS — Adult children caring for aging parents, spouses managing family healthcare decisions. Reaches the person booking the appointment for Rita or Irene.
68. YOGA, PILATES & MINDFUL MOVEMENT COMMUNITIES — Body-aware, health-invested active lifestyle people who value expert physical care. Predisposed to the whole-body comprehensive care message.
69. EMPLOYER HEALTH & WORKPLACE WELLNESS DECISION-MAKERS — HR professionals, small business owners following workplace wellness and employee health benefit content. B2B referral pipeline opportunity.

70. WEIGHT LOSS & ANTI-INFLAMMATORY LIFESTYLE COMMUNITY — Strong correlation between this audience and musculoskeletal pain. Joint health supplement followers, arthritis awareness pages, anti-inflammatory diet communities.
71. SPORTS MEDICINE & INJURY PREVENTION CONTENT CONSUMERS — NSCA followers, sports medicine podcast listeners, athletic training and performance optimization audiences. Sophisticated, credibility-responsive audience.
72. LOOKALIKE AUDIENCE — PAST APPOINTMENT BOOKERS — Upload existing patient email list to META Custom Audiences, build 1–2% Lookalike. Statistically most likely to convert from ad to appointment.
73. ORTHOPEDIC & SPINE HEALTH PRODUCT PURCHASERS — Recent purchasers of back braces, knee sleeves, ergonomic furniture, pain relief devices. Self-treating patients one step from professional PT.
74. FAITH COMMUNITY & CHURCH NETWORK MEMBERS — Local church communities near all 6 locations. Deep overlap with Care PT avatar profiles. Faith networks are powerful word-of-mouth engines in the South.
75. VIDEO AD RE-ENGAGERS & WEBSITE RETARGETING — 75%+ video viewers, website visitors last 30–90 days, Instagram/Facebook page engagers who have NOT booked. Warmest possible audience. Lowest cost-per-appointment.

---

## B. 3 STRATEGIC CAMPAIGN IDEAS

---

### CAMPAIGN 1: The Comeback Stories Campaign

**Objective:** Lead generation — drive appointment requests from post-surgical and chronic pain avatars

**Core Concept:** Patient success story-driven ads. Real patient testimonials (video or quote card) paired with the message 'Your comeback story starts here.' Each ad features a different patient type — post-surgical, chronic pain, active adult — to pre-qualify the right avatar for each ad set.

**Ad Format:** Video testimonials (15–30 sec) + Quote card statics + Long-form post copy

**Target Cohorts:** Cohorts 1, 2, 3, 8 (Lookalike), 20 (Retargeting)

**CTA:** Request an Appointment → [carephysicaltherapy.net](https://carephysicaltherapy.net)

### CAMPAIGN 2: The Expert Authority Campaign

**Objective:** Awareness + lead generation — build trust with skeptical/first-time PT prospects

**Core Concept:** Educational video content from Care PT therapists explaining common misconceptions about PT, the whole-body evaluation approach, and what makes Care PT different. Positions the clinic as the trusted authority in the region.

**Ad Format:** 60–90 second educational videos + Infographic statics + Short-form copy

**Target Cohorts:** Cohorts 4, 6, 11, 16, 17 (Lookalike from patient list)

**CTA:** Request an Appointment → [carephysicaltherapy.net](https://carephysicaltherapy.net)

### CAMPAIGN 3: The Community & Family Campaign

**Objective:** Local awareness + lead generation — dominate each of the 6 community markets

**Core Concept:** Hyper-local ads featuring each specific clinic location, local staff, and community connection. 'Your neighbors trust Care PT — and so can you.' Leverages the Care PT family culture USP directly with the geographic community surrounding each clinic.

**Ad Format:** Warm behind-the-scenes clinic photos + Staff spotlight videos + Short-form copy

**Target Cohorts:** Cohort 10 (Local neighborhood groups), 19 (Faith communities), 13 (Yoga/wellness), 18 (Retirees/seniors)

## C. BRAND STYLE GUIDE

---

### Voice & Tone

**Primary Tone:** Professional, Reassuring, Solution-Oriented

**Secondary Tone:** Warm, Empathetic, Family-Oriented

- Write as a trusted expert who genuinely cares — not a salesperson
- Lead with the patient's experience and outcome, not the clinic's credentials
- Use plain language — no medical jargon unless explained immediately
- Be direct about what we offer and what makes us different
- Never minimize pain — acknowledge it fully before offering the solution
- The 'family' culture should come through in every piece of copy — this is the emotional core of the brand

### Key Brand Messages

- "When you're here, you're family"
- "Individualized, hands-on care — close to your home"
- "Comprehensive care — not just looking at the injury, looking at the whole you"
- "To inspire and empower through healing" — the mission
- "Thousands treated" — the social proof anchor
- "6 convenient locations" — the logistics answer

### Visual Direction

- Colors: Care PT blue (#1B4F8A primary), teal (#2E86AB accent), clean white backgrounds
- Photography: Real, warm, authentic — never stock-photo generic. Real staff, real patients, real clinic
- Video: Warm lighting, natural conversation, direct eye contact. Clinic visible in background
- Typography: Clean, modern sans-serif. Bold for headlines, readable for body copy
- Avoid: Clinical coldness, overly medical imagery, impersonal stock photos of generic people

### Content Pillars

- PATIENT STORIES — Real recovery journeys that mirror the avatars' experiences
- EXPERT EDUCATION — Therapist-led content demonstrating clinical knowledge and care philosophy
- CLINIC CULTURE — Behind-the-scenes warmth showing the family environment
- COMMUNITY — Local roots, doctor relationships, regional presence and trust
- OUTCOMES — Before/after capability, milestone achievements, testimonials

---

## D. \$20 MICRO BUDGET STRATEGY

---

*When you are ready to launch your ads based on this AI Promotion Primer, we recommend starting with a Micro Budget Strategy to test your creatives before scaling.*

The easiest and lowest-risk way to validate your ad creative and targeting before committing a larger budget is the META Micro Budget approach. By testing multiple ad variations at \$5–\$10/day per ad set, you can identify winning headlines, copy, and creatives with minimal financial exposure before scaling what works.

### Recommended Starting Framework

- Start with \$20/day total budget split across 2–3 ad sets
- Test 2–3 different headlines from the 25 provided in Part 3
- Test 2 different ad formats: video vs. static image
- Run for 5–7 days minimum before making optimization decisions
- The winning ad (lowest cost per appointment request) gets the scaled budget
- Retargeting audience (Cohort 20) should always run alongside cold audiences — it will produce the lowest CPL

For comprehensive training on implementing this AI Promotion Primer into META ads and the full Micro Budget Strategy, visit: <https://youradcoach.pages.ontraport.net/micro-budget-mastery>

---

## E. CAMPAIGN KPIs & SUCCESS METRICS

---

**Primary KPI:** New patient appointment requests (form submissions via website)

**Secondary KPIs:** Cost per appointment request, click-through rate, video view rate (75%+), landing page conversion rate

**Target Audience:** Adults 18–54 in Louisiana and Mississippi near Care PT's 6 locations

**Attribution Window:** 7-day click, 1-day view (META standard)

**Recommended Testing Period:** Minimum 2 weeks before optimization decisions; minimum 4 weeks before scaling decisions

**Quality Indicator:** Appointment request quality — are patients matching the avatar profile?  
Insurance-eligible, privately insured, referred or self-referred through ad
